List of Subjects

1 Methods

1.1 Theoretical

1.1.1 Group theory and algebras
1.1.2 Classical mechanics *
1.1.3 Quantized field theory *
1.1.4 Many body and quasiparticle approaches *
1.1.5 Coupling schemes and perturbative treatments *
1.1.6 Relativistic quantum mechanics
1.1.7 Transport quantum mechanics
1.1.8 Equilibrium statistical mechanics *
1.1.9 Statistical mechanics of stationary states *
1.1.10 Non-equilibrium thermodynamic and hydrodynamic theories *
1.1.11 Ab initio schemes for stationary properties *
1.1.12 Computational and simulation methods *
1.1.13 Molecular dynamics and scattering theory *

1.2 Experimental

1.2.1 Magnetic resonances
1.2.2 Cyclotron resonance
1.2.3 Microwave spectroscopy
1.2.4 Infrared spectroscopy *
1.2.5 Raman spectroscopy *
1.2.6 Visible and UV spectroscopy *
1.2.7 Fluorescence spectroscopy *
1.2.8 Photoelectron and Auger spectroscopy *
1.2.9 X-ray spectroscopy
1.2.10 Electron impact spectroscopy *
1.2.11 Laser methods *
1.2.12 Picosecond spectroscopy *
1.2.13 Non-linear optical spectroscopy
1.2.14 Synchrotron spectroscopies
1.2.15 Coherent optical spectroscopy
1.2.16 Optical pumping
1.2.17 Multiple resonance spectroscopy
1.2.18 Optoacoustic spectroscopy
1.2.19 Atomic and molecular beam techniques *
1.2.20 Time-resolved experiments *
1.2.21 Mass spectrometry *
1.2.22 Radiolysis
1.2.23 Mössbauer spectroscopy
1.2.24 X-ray, electron and neutron diffraction
1.2.25 Neutron scattering *
1.2.26 Light scattering
1.2.27 Field emission and field ionization
1.2.28 Measurement of macroscopic variables *

2 Objects

2.1 Bulk systems

2.1.1 Gases *
2.1.2 Supersonic beams *
2.1.3 Liquids neat *
2.1.4 Liquid mixtures and solutions *
2.1.5 Crystals *
2.1.5.1 neat *
2.1.5.2 mixed
2.1.6 Glasses *
2.1.7 Liquid crystals *
2.1.8 Polymers
2.1.9 Semiconductors *
2.1.10 Metals and alloys
2.1.11 Thin films *
2.1.12 Surfaces
2.1.13 Low-dimensional materials *
2.1.14 Dielectrics *
2.1.15 Plasmas
2.1.16 Biological systems *

2.2 Microscopic systems

2.2.1 Atoms *
2.2.2 Molecules (neutral and ionic) *
2.2.2.1 diatomic *
2.2.2.2 small polyatomics *
2.2.2.3 aromatics *
2.2.2.4 other large
2.2.2.5 polymeric and biological *
2.2.3 Molecular aggregates *
2.2.3.1 dimers *
2.2.3.2 van der Waals molecules
2.2.3.3 clusters *
2.2.3.4 complexes *
2.2.4 Free radicals (including hydronium and muonium) *
2.2.5 Quasiparticles (including excitons)
2.2.6 Defects and impurities *
2.2.7 Ions and charge carriers *

* Denotes subjects covered in this volume

3 Phenomena

3.1 Molecular structure *
3.2 Vibrations and rotations of molecules *
3.3 Electronic structure and states *
3.4 Electric and magnetic properties *
3.5 Spin splittings
3.6 Optical activity *
3.7 Molecular interactions *
3.8 Spectral bandshapes and intensities *
3.9 Coupling of electronic and nuclear motion *
3.10 Energy transfer processes *
3.11 Molecular photophysical processes *
3.12 Intramolecular dynamics
3.12.1 radiationless transitions
3.12.2 vibrational energy redistribution (including vibrational dissociation)
3.13 Luminescence spectra, yields and lifetimes *
3.14 Coherence loss processes
3.15 Non-linear responses (including optical) *
3.16 Multiphoton phenomena
3.17 Reactions (including dissociation) *
3.17.1 gas phase *
3.17.2 condensed phase *
3.17.3 photochemical *
3.18 Tunnelling *
3.19 Electron transfer *
3.20 Positron annihilation *
3.21 Ionization (including Rydberg states) *
3.22 Molecular motion (including diffusive)
3.23 Isotopic effects *
3.24 Fluctuations and noise
3.25 Collective motion and excitations
3.26 Surface effects and catalysis
3.27 Thermodynamic and transport properties *
3.28 Structure of solids and liquids *
3.29 Critical phenomena
3.30 Phase transitions

Subject Index to Volume 150

Methods

Theoretical

Classical mechanics

Electrostatic interactions within helical structures of chiral lipid bilayers, J.S. Chappell and P. Yager 150 (1991) 73

Quantized field theory

Fluorides of ruthenium and chromium: theoretical studies, A. Jarid, M. Aaid, Y. Legoux, J. Merini, M. Loudet, D. Gonbeau and G. Pfister-Guillouzo 150 (1991) 353

Many body and quasiparticle approaches

Electron correlation and solvation effects. I. Basic formulation and preliminary attempt to include the electron correlation in the quantum mechanical polarizable continuum model so as to study solvation phenomena, F.J. Olivares del Valle and J. Tomasi 150 (1991) 139
Electron correlation and solvation effects. II. The description of the vibrational properties of a water molecule in a dielectric given by the application of the polarizable continuum model with inclusion of correlation effects, M.A. Aguilar, F.J. Olivares del Valle and J. Tomasi 150 (1991) 151
Non-equilibrium effects on forward and reverse rate coefficients of reversible reactions in solution: A stochastic approach, W. Naumann 150 (1991) 187
Electron momentum spectroscopy of sulphurhexafluoride, E. Weigold, Y. Zheng and W. von Niessen 150 (1991) 405

Coupling schemes and perturbative treatments

Semi-classical theory of laser-induced circular birefringence, resonance, and optical activity in scattered radiation, M.W. Evans 150 (1991) 197
Angular overlap model parameterisation of Anderson's superexchange theory. I. A quantification of Goodenough–Kanamori rules, M. Atanasov and S. Angelo 150 (1991) 383

Equilibrium statistical mechanics

A comparative study of the water-dimer gas-phase thermodynamics in the BJH- and MCYL-type flexible potentials, Z. Slanina 150 (1991) 321

Statistical mechanics of stationary states

Mössbauer spectra of mixed-valence dimeric iron clusters in charge-ordered crystals, A.V. Koryachenko, S.I. Klokishner and B.S. Tsukerblat 150 (1991) 295
Correlations in anticrossing spectra and scattering theory: numerical simulations, U. Hartmann, H.A. Weidenmüller and T. Guhr 150 (1991) 311

Non-equilibrium thermodynamic and hydrodynamic theories
Non-equilibrium effects on forward and reverse rate coefficients of reversible reactions in solution: a stochastic approach, W. Naumann 150 (1991) 187

Ab initio schemes for stationary properties
Ab initio calculation of nuclear quadrupole coupling constants of rovibrational levels in the $X^1\Sigma^+$ state of all isotopic variants of BH, J. Vojtík, L. Češpiva, I. Paidarová and J. Šavrda 150 (1991) 65
Electron correlation and solvation effects. I. Basic formulation and preliminary attempt to include the electron correlation in the quantum mechanical polarizable continuum model so as to study solvation phenomena, F.J. Olivares del Valle and J. Tomasi 150 (1991) 139
Electron correlation and solvation effects. II. The description of the vibrational properties of a water molecule in a dielectric given by the application of the polarizable continuum model with inclusion of correlation effects, M.A. Aguilar, F.J. Olivares del Valle and J. Tomasi 150 (1991) 151
New variations in two-electron integral evaluation in the context of direct SCF procedures, T.P. Hamilton and H.F. Schaefer III 150 (1991) 163
Theoretical determination of paramagnetic susceptibilities from nuclear electromagnetic shieldings, P. Lazzeretti, M. Malagoli and R. Zanasi 150 (1991) 173
A comparative study of the water-dimer gas-phase thermodynamics in the BJH- and MCYL-type flexible potentials, Z. Slanina 150 (1991) 321
Ab initio MRD-CI study of $GaAs^-$, $GaAs_2^{(\pm)}$, $Ga_2A_2^{(\pm)}$, $As_2^{(\pm)}$ and As_4 clusters, U. Meier, S.D. Peyerimhoff and F. Grein 150 (1991) 331
Fluorides of ruthenium and chromium: theoretical studies, A. Jarid, M. Aaid, Y. Legoux, J. Merini, M. Loudet, D. Gonbeau and G. Pfister-Guillouzo 150 (1991) 353

Computational and simulation methods
On the solution of the Debye–Smoluchowski equation with a Coulomb potential. II. An approximation of the time-dependent rate constant, S.D. Traytak 150 (1991) 1
Construction of molecular potential energy curves by an optimization method, J. Wang, A.J. Blake, D.G. McCoy and L. Torop 150 (1991) 13
An examination of primary and secondary dissociation pathways of trifluoromethanol: identification of plausible routes leading to the formation of hydrogen fluoride, J.S. Francisco 150 (1991) 19
The possibility of "long" population inversion in active media for IR chemical lasers, B.D. Barmashenko and V.A. Kochelap 150 (1991) 29
Annealing graphite-like structures. A Monte Carlo–Quantum chemical study, F. Zerbetto 150 (1991) 39
Manifestations of adiabaticity and of strength of rotational inelastic collisions in time domain CARS spectra of nitrogen, A.I. Burshtein, D.V. Kolomoitsev, S.Yu. Nikitin and A.V. Storozhev 150 (1991) 231
The relationship between physical observables and the potential energy surface in the He–HF system, M.J. Smith and H. Rabitz 150 (1991) 361
Optimal control of molecular motion: nonlinear field effects, K. Yao, S. Shi and H. Rabitz 150 (1991) 373
FT-IR spectral data and ab inito calculations for haloketenes, G. Davidovics, M. Monnier and A. Allouche 150 (1991) 395

Molecular dynamics and scattering theory
Annealing graphite-like structures. A Monte Carlo–Quantum chemical study, F. Zerbetto 150 (1991) 39
Generalized golden rule approach to the H-transfer problem in polyatomic systems. 1. Multimode nuclear effects in solids, Z.K. Smedarchina 150 (1991) 47
Time decay and fluorescence quenching in a one-dimensional lattice, J. Dudkiewicz and R. Twardowski 150 (1991) 57
Correlations in anticrossing spectra and scattering theory: numerical simulations, U. Hartmann, H.A. Weidenmüller and T. Guhr 150 (1991) 311
The relationship between physical observables and the potential energy surface in the He–HF system, M.J. Smith and H. Rabitz 150 (1991) 361
Optimal control of molecular motion: nonlinear field effects, K. Yao, S. Shi and H. Rabitz 150 (1991) 373

Experimental

Infrared spectroscopy
FT-IR spectral data and ab inito calculations for haloketenes, G. Davidovics, M. Monnier and A. Allouche 150 (1991) 395

Raman spectroscopy
Manifestations of adiabaticity and of strength of rotational inelastic collisions in time domain CARS spectra of nitrogen, A.I. Burshtein, D.V. Kolomoitsev, S.Yu. Nikitin and A.V. Storozhev 150 (1991) 231
Second-order Raman effects, inelastic neutron scattering and lattice dynamics in 2H–WS_2, C. Sourisseau, F. Cruege, M. Fouassier and M. Alba 150 (1991) 281

Visible and UV spectroscopy
Direct measurement of rate constants for the reactions of CH and CD with HCN and DCN, S. Zabarnick, J.W. Fleming and M.C. Lin 150 (1991) 109
Dimethylaminocyanobiphenyl (DMACB): a new optimized molecular crystal for quadratic nonlinear optics in the visible, J. Zyss, I. Ledoux, M. Bertault and E. Toupet 150 (1991) 125
Absolute oscillator strengths for photoabsorption, photoionization and ionic photofragmentation of sulphur dioxide. I. The valence shell, G. Cooper, E.B. Zarate, R.K. Jones and C.E. Brion 150 (1991) 237
Absolute oscillator strengths for photoabsorption, photoionization and ionic photofragmentation of sulphur dioxide. II. The S 2p and 2s inner shells, G. Cooper, E.B. Zarate, R.K. Jones and C.E. Brion 150 (1991) 251
Comparison of intensity distribution in the spectra of complex molecules cooled in a supersonic jet and in a crystalline matrix, T.V. Plakhotnik, R.I. Personov and E.A. Gastilovich 150 (1991) 429

Fluorescence spectroscopy
Site-selective fluorescence studies on polysilylenes, A. Elschner, R.F. Mahrt, L. Pautmeier, H. Bässler, M. Stolka and K. McGrane 150 (1991) 81
Rotational structure and splitting phenomena in electronic spectra of matrix-isolated NH, C. Blindauer, N. van Riesenbeck, K. Seranski, M. Winter, A.C. Becker and U. Schurath 150 (1991) 93
Direct measurement of rate constants for the reactions of CH and CD with HCN and DCN, S. Zabarnick, J.W. Fleming and M.C. Lin 150 (1991) 109
Fluorescence depolarization of solutions and ordered systems. Photochemical reactions in the excited states. I. General considerations, J.J. Fisz 150 (1991) 207

Comparison of intensity distribution in the spectra of complex molecules cooled in a supersonic jet and in a crystalline matrix, T.V. Plakhotnik, R.I. Personov and E.A. Gastilovich 150 (1991) 429
Excitation energy transport in fractal aggregates, T.G. Dewey 150 (1991) 445

Photoelectron and Auger spectroscopy
Shifts in photoionization fragmentation onsets. A direct measure of cooling in a supersonic molecular beam, K.-M. Weitzel, J. Booze and T. Baer 150 (1991) 263

Electron impact spectroscopy
Electron momentum spectroscopy of sulphurhexafluoride, E. Weigold, Y. Zheng and W. von Niessen 150 (1991) 405

Laser methods
Rotational structure and splitting phenomena in electronic spectra of matrix-isolated NH, C. Blindauer, N. van Riesenbeck, K. Seranski, M. Winter, A.C. Becker and U. Schurath 150 (1991) 93
Nonlinear optical properties of asymmetric polyphenyls: efficiency versus transparency trade-off, I. Ledoux, J. Zyss, A. Jutand and C. Amatore 150 (1991) 117
Dimethylaminocyanobiphenyl (DMACB): a new optimized molecular crystal for quadratic nonlinear optics in the visible, J. Zyss, I. Ledoux, M. Bertault and E. Toupet 150 (1991) 125

Picosecond spectroscopy
Fluorescence depolarization of solutions and ordered systems. Photochemical reactions in the excited states. I. General considerations, J.J. Fisz 150 (1991) 207

Atomic and molecular beam techniques
Translational energy spectroscopy of N^+ and O^+ in collison with O_2, A.R. Lee, C.S. Enos and A.G. Brenton 150 (1991) 275

Time-resolved experiments
Pressure effect on positronium reactions in organic solutions, Y. Kobayashi 150 (1991) 453

Mass spectrometry
Shifts in photoionization fragmentation onsets. A direct measure of cooling in a supersonic molecular beam, K.-M. Weitzel, J. Booze and T. Baer 150 (1991) 263
Translational energy spectroscopy of N^+ and O^+ in collison with O_2, A.R. Lee, C.S. Enos and A.G. Brenton 150 (1991) 275

Neutron scattering
Second-order Raman effects, inelastic neutron scattering and lattice dynamics in 2H–WS_2, C. Sourisseau, F. Cruege, M. Fouassier and M. Alba 150 (1991) 281

Measurement of macroscopic variables
Comment on "dielectric relaxation processes of symmetrically substituted phenols in a few glassy media", J. Gilchrist 150 (1991) 461
Response to "Comment on dielectric relaxation processes of symmetrically substituted phenols in a few glassy media", S. Walker 150 (1991) 463
A comparative study of the water-dimer gas-phase thermodynamics in the BJH- and MCYL-type flexible potentials, Z. Slanina 150 (1991) 321

Objects

Bulk systems

Gases

An examination of primary and secondary dissociation pathways of trifluoromethanol: identification of plausible routes leading to the formation of hydrogen fluoride, J.S. Francisco 150 (1991) 19
The possibility of "long" population inversion in active media for IR chemical lasers, B.D. Barmashenko and V.A. Kochelap 150 (1991) 29
Semi-classical theory of laser-induced circular birefringence, resonance, and optical activity in scattered radiation, M.W. Evans 150 (1991) 197
Manifestations of adiabaticity and of strength of rotational inelastic collisions in time domain CARS spectra of nitrogen, A.I. Burshtein, D.V. Kolomoitsev, S.Yu. Nikitin and A.V. Storozhev 150 (1991) 231

Supersonic beams

Shifts in photoionization fragmentation onsets. A direct measure of cooling in a supersonic molecular beam, K.-M. Weitzel, J. Booze and T. Baer 150 (1991) 263
Comparison of intensity distribution in the spectra of complex molecules cooled in a supersonic jet and in a crystalline matrix, T.V. Plakhotnik, R.I. Personov and E.A. Gastilovich 150 (1991) 429

Liquids neat

Electron correlation and solvation effects. II. The description of the vibrational properties of a water molecule in a dielectric given by the application of the polarizable continuum model with inclusion of correlation effects, M.A. Aguilar, F.J. Olivares del Valle and J. Tomasi 150 (1991) 151
Semi-classical theory of laser-induced circular birefringence, resonance, and optical activity in scattered radiation, M.W. Evans 150 (1991) 197

Liquid mixtures and solutions

On the solution of the Debye–Smoluchowski equation with a Coulomb potential. II. An approximation of the time-dependent rate constant, S.D. Traytak 150 (1991) 1
Electron correlation and solvation effects. I. Basic formulation and preliminary attempt to include the electron correlation in the quantum mechanical polarizable continuum model so as to study solvation phenomena, F.J. Olivares del Valle and J. Tomasi 150 (1991) 139
Non-equilibrium effects on forward and reverse rate coefficients of reversible reactions in solution: a stochastic approach, W. Naumann 150 (1991) 187
Pressure effect on positronium reactions in organic solutions, Y. Kobayashi 150 (1991) 453

Crystals

Generalized golden rule approach to the H-transfer problem in polyatomic systems. 1. Multimode nuclear effects in solids, Z.K. Smedarchina 150 (1991) 47
Dimethylaminocyanobiphenyl (DMACB): a new optimized molecular crystal for quadratic nonlinear optics in the visible, J. Zyss, I. Ledoux, M. Bertault and E. Toupet 150 (1991) 125
Angular overlap model parameterisation of Anderson's superexchange theory. I. A quantification of Goodenough–Kanamori rules, M. Atanasov and S. Angelo 150 (1991) 383

–neat
Dimethylaminocyanobiphenyl (DMACB): a new optimized molecular crystal for quadratic nonlinear optics in the visible, J. Zyss, I. Ledoux, M. Bertault and E. Toupet 150 (1991) 125

Glasses
Site-selective fluorescence studies on polysilylenes, A. Elschner, R.F. Mahrt, L. Pautmeier, H. Bässler, M. Stolka and K. McGrane 150 (1991) 81
Comment on "dielectric relaxation processes of symmetrically substituted phenols in a few glassy media", J. Gilchrist 150 (1991) 461
Response to "Comment on dielectric relaxation processes of symmetrically substituted phenols in a few glassy media", S. Walker 150 (1991) 463

Liquid crystals
Fluorescence depolarization of solutions and ordered systems. Photochemical reactions in the excited states. I. General considerations, J.J. Fisz 150 (1991) 207

Semiconductors
Second-order Raman effects, inelastic neutron scattering and lattice dynamics in 2H–WS_2, C. Sourisseau, F. Cruege, M. Fouassier and M. Alba 150 (1991) 281

Thin films
Electrostatic interactions within helical structures of chiral lipid bilayers, J.S. Chappell and P. Yager 150 (1991) 73

Low-dimensional materials
Time decay and fluorescence quenching in a one-dimensional lattice, J. Dudkiewicz and R. Twardowski 150 (1991) 57
Second-order Raman effects, inelastic neutron scattering and lattice dynamics in 2H–WS_2, C. Sourisseau, F. Cruege, M. Fouassier and M. Alba 150 (1991) 281

Dielectrics
Comment on "dielectric relaxation processes of symmetrically substituted phenols in a few glassy media", J. Gilchrist 150 (1991) 461
Response to "Comment on dielectric relaxation processes of symmetrically substituted phenols in a few glassy media", S. Walker 150 (1991) 463

Biological systems
Electrostatic interactions within helical structures of chiral lipid bilayers, J.S. Chappell and P. Yager 150 (1991) 73
Fluorescence depolarization of solutions and ordered systems. Photochemical reactions in the excited states. I. General considerations, J.J. Fisz 150 (1991) 207

Microscopic systems

Atoms
New variations in two-electron integral evaluation in the context of direct SCF procedures, T.P. Hamilton and H.F. Schaefer III 150 (1991) 163

Translational energy spectroscopy of N^+ and O^+ in collison with O_2, A.R. Lee, C.S. Enos and A.G. Brenton 150 (1991) 275

Molecules (neutral and ionic)

Nonlinear optical properties of asymmetric polyphenyls: efficiency versus transparency trade-off, I. Ledoux, J. Zyss, A. Jutand and C. Amatore 150 (1991) 117

Semi-classical theory of laser-induced circular birefringence, resonance, and optical activity in scattered radiation, M.W. Evans 150 (1991) 197

Correlations in anticrossing spectra and scattering theory: numerical simulations, U. Hartmann, H.A. Weidenmüller and T. Guhr 150 (1991) 311

–diatomic

Construction of molecular potential energy curves by an optimization method, J. Wang, A.J. Blake, D.G. McCoy and L. Torop 150 (1991) 13

The possibility of "long" population inversion in active media for IR chemical lasers, B.D. Barmashenko and V.A. Kochelap 150 (1991) 29

Ab initio calculation of nuclear quadrupole coupling constants of rovibrational levels in the $X\,^1\Sigma^+$ state of all isotopic variants of BH, J. Vojtík, L. Češpiva, I. Paidarová and J. Šavrda 150 (1991) 65

Rotational structure and splitting phenomena in electronic spectra of matrix-isolated NH, C. Blindauer, N. van Riesenbeck, K. Seranski, M. Winter, A.C. Becker and U. Schurath 150 (1991) 93

Manifestations of adiabaticity and of strength of rotational inelastic collisions in time domain CARS spectra of nitrogen, A.I. Burshtein, D.V. Kolomoitsev, S.Yu. Nikitin and A.V. Storozhev 150 (1991) 231

Translational energy spectroscopy of N^+ and O^+ in collison with O_2, A.R. Lee, C.S. Enos and A.G. Brenton 150 (1991) 275

Ab initio MRD-CI study of $GaAs^-$, $GaAs_2^{(\pm)}$, $Ga_2A_2^{(\pm)}$, $As_2^{(\pm)}$ and As_4 clusters, U. Meier, S.D. Peyerimhoff and F. Grein 150 (1991) 331

The relationship between physical observables and the potential energy surface in the He–HF system, M.J. Smith and H. Rabitz 150 (1991) 361

–small polyatomics

An examination of primary and secondary dissociation pathways of trifluoromethanol: identification of plausible routes leading to the formation of hydrogen fluoride, J.S. Francisco 150 (1991) 19

Theoretical determination of paramagnetic susceptibilities from nuclear electromagnetic shieldings, P. Lazzeretti, M. Malagoli and R. Zanasi 150 (1991) 173

Absolute oscillator strengths for photoabsorption, photoionization and ionic photofragmentation of sulphur dioxide. I. The valence shell, G. Cooper, E.B. Zarate, R.K. Jones and C.E. Brion 150 (1991) 237

Absolute oscillator strengths for photoabsorption, photoionization and ionic photofragmentation of sulphur dioxide. II. The S 2p and 2s inner shells, G. Cooper, E.B. Zarate, R.K. Jones and C.E. Brion 150 (1991) 251

Shifts in photoionization fragmentation onsets. A direct measure of cooling in a supersonic molecular beam, K.-M. Weitzel, J. Booze and T. Baer 150 (1991) 263

Ab initio MRD-CI study of $GaAs^-$, $GaAs_2^{(\pm)}$, $Ga_2A_2^{(\pm)}$, $As_2^{(\pm)}$ and As_4 clusters, U. Meier, S.D. Peyerimhoff and F. Grein 150 (1991) 331

Optimal control of molecular motion: nonlinear field effects, K. Yao, S. Shi and H. Rabitz 150 (1991) 373
Electron momentum spectroscopy of sulphurhexafluoride, E. Weigold, Y. Zheng and W. von Niessen 150 (1991) 405

–aromatics
Nonlinear optical properties of asymmetric polyphenyls: efficiency versus transparency trade-off, I. Ledoux, J. Zyss, A. Jutand and C. Amatore 150 (1991) 117

–polymeric and biological
Site-selective fluorescence studies on polysilylenes, A. Elschner, R.F. Mahrt, L. Pautmeier, H. Bässler, M. Stolka and K. McGrane 150 (1991) 81

Molecular aggregates
Excitation energy transport in fractal aggregates, T.G. Dewey 150 (1991) 445

–dimers
A comparative study of the water-dimer gas-phase thermodynamics in the BJH- and MCYL-type flexible potentials, Z. Slanina 150 (1991) 321
Angular overlap model parameterisation of Anderson's superexchange theory. I. A quantification of Goodenough–Kanamori rules, M. Atanasov and S. Angelo 150 (1991) 383

–clusters
Annealing graphite-like structures. A Monte Carlo–Quantum chemical study, F. Zerbetto 150 (1991) 39
Mössbauer spectra of mixed-valence dimeric iron clusters in charge-ordered crystals, A.V. Koryachenko, S.I. Klokishner and B.S. Tsukerblat 150 (1991) 295
Ab initio MRD-CI study of $GaAs^-$, $GaAs_2^{(\pm)}$, $Ga_2A_2^{(\pm)}$, $As_2^{(\pm)}$ and As_4 clusters, U. Meier, S.D. Peyerimhoff and F. Grein 150 (1991) 331
Excitation energy transport in fractal aggregates, T.G. Dewey 150 (1991) 445

–complexes
Fluorides of ruthenium and chromium: theoretical studies, A. Jarid, M. Aaid, Y. Legoux, J. Merini, M. Loudet, D. Gonbeau and G. Pfister-Guillouzo 150 (1991) 353

Free radicals (including hydronium and muonium)
Direct measurement of rate constants for the reactions of CH and CD with HCN and DCN, S. Zabarnick, J.W. Fleming and M.C. Lin 150 (1991) 109

Defects and impurities
Rotational structure and splitting phenomena in electronic spectra of matrix-isolated NH, C. Blindauer, N. van Riesenbeck, K. Seranski, M. Winter, A.C. Becker and U. Schurath 150 (1991) 93

Ions and charge carriers
On the solution of the Debye–Smoluchowski equation with a Coulomb potential. II. An approximation of the time-dependent rate constant, S.D. Traytak 150 (1991) 1

Phenomena

Molecular structure

An examination of primary and secondary dissociation pathways of trifluoromethanol: identification of plausible routes leading to the formation of hydrogen fluoride, J.S. Francisco 150 (1991) 19

Annealing graphite-like structures. A Monte Carlo–Quantum chemical study, F. Zerbetto 150 (1991) 39

Vibrations and rotations of molecules

The possibility of "long" population inversion in active media for IR chemical lasers, B.D. Barmashenko and V.A. Kochelap 150 (1991) 29

Ab initio calculation of nuclear quadrupole coupling constants of rovibrational levels in the $X^1\Sigma^+$ state of all isotopic variants of BH, J. Vojtík, L. Češpiva, I. Paidarová and J. Šavrda 150 (1991) 65

Electron correlation and solvation effects. II. The description of the vibrational properties of a water molecule in a dielectric given by the application of the polarizable continuum model with inclusion of correlation effects, M.A. Aguilar, F.J. Olivares del Valle and J. Tomasi 150 (1991) 151

Manifestations of adiabaticity and of strength of rotational inelastic collisions in time domain CARS spectra of nitrogen, A.I. Burshtein, D.V. Kolomoitsev, S.Yu. Nikitin and A.V. Storozhev 150 (1991) 231

The relationship between physical observables and the potential energy surface in the He–HF system, M.J. Smith and H. Rabitz 150 (1991) 361

Optimal control of molecular motion: nonlinear field effects, K. Yao, S. Shi and H. Rabitz 150 (1991) 373

Comparison of intensity distribution in the spectra of complex molecules cooled in a supersonic jet and in a crystalline matrix, T.V. Plakhotnik, R.I. Personov and E.A. Gastilovich 150 (1991) 429

Electronic structure and states

Ab initio calculation of nuclear quadrupole coupling constants of rovibrational levels in the $X^1\Sigma^+$ state of all isotopic variants of BH, J. Vojtík, L. Češpiva, I. Paidarová and J. Šavrda 150 (1991) 65

Rotational structure and splitting phenomena in electronic spectra of matrix-isolated NH, C. Blindauer, N. van Riesenbeck, K. Seranski, M. Winter, A.C. Becker and U. Schurath 150 (1991) 93

New variations in two-electron integral evaluation in the context of direct SCF procedures, T.P. Hamilton and H.F. Schaefer III 150 (1991) 163

Translational energy spectroscopy of N^+ and O^+ in collison with O_2, A.R. Lee, C.S. Enos and A.G. Brenton 150 (1991) 275

Second-order Raman effects, inelastic neutron scattering and lattice dynamics in 2H–WS_2, C. Sourisseau, F. Cruege, M. Fouassier and M. Alba 150 (1991) 281

Fluorides of ruthenium and chromium: theoretical studies, A. Jarid, M. Aaid, Y. Legoux, J. Merini, M. Loudet, D. Gonbeau and G. Pfister-Guillouzo 150 (1991) 353

Angular overlap model parameterisation of Anderson's superexchange theory. I. A quantification of Goodenough–Kanamori rules, M. Atanasov and S. Angelo 150 (1991) 383

Electron momentum spectroscopy of sulphurhexafluoride, E. Weigold, Y. Zheng and W. von Niessen 150 (1991) 405

Electric and magnetic properties
Ab initio calculation of nuclear quadrupole coupling constants of rovibrational levels in the $X^1\Sigma^+$ state of all isotopic variants of BH, J. Vojtík, L. Češpiva, I. Paidarová and J. Šavrda 150 (1991) 65
Theoretical determination of paramagnetic susceptibilities from nuclear electromagnetic shieldings, P. Lazzeretti, M. Malagoli and R. Zanasi 150 (1991) 173
Angular overlap model parameterisation of Anderson's superexchange theory. I. A quantification of Goodenough–Kanamori rules, M. Atanasov and S. Angelo 150 (1991) 383

Optical activity
Semi-classical theory of laser-induced circular birefringence, resonance, and optical activity in scattered radiation, M.W. Evans 150 (1991) 197

Molecular interactions
The possibility of "long" population inversion in active media for IR chemical lasers, B.D. Barmashenko and V.A. Kochelap 150 (1991) 29
Comment on "dielectric relaxation processes of symmetrically substituted phenols in a few glassy media", J. Gilchrist 150 (1991) 461
Response to "Comment on dielectric relaxation processes of symmetrically substituted phenols in a few glassy media", S. Walker 150 (1991) 463

Spectral bandshapes and intensities
Absolute oscillator strengths for photoabsorption, photoionization and ionic photofragmentation of sulphur dioxide. I. The valence shell, G. Cooper, E.B. Zarate, R.K. Jones and C.E. Brion 150 (1991) 237
Absolute oscillator strengths for photoabsorption, photoionization and ionic photofragmentation of sulphur dioxide. II. The S 2p and 2s inner shells, G. Cooper, E.B. Zarate, R.K. Jones and C.E. Brion 150 (1991) 251
Mössbauer spectra of mixed-valence dimeric iron clusters in charge-ordered crystals, A.V. Koryachenko, S.I. Klokishner and B.S. Tsukerblat 150 (1991) 295
Comparison of intensity distribution in the spectra of complex molecules cooled in a supersonic jet and in a crystalline matrix, T.V. Plakhotnik, R.I. Personov and E.A. Gastilovich 150 (1991) 429

Coupling of electronic and nuclear motion
Construction of molecular potential energy curves by an optimization method, J. Wang, A.J. Blake, D.G. McCoy and L. Torop 150 (1991) 13

Energy transfer processes
Time decay and fluorescence quenching in a one-dimensional lattice, J. Dudkiewicz and R. Twardowski 150 (1991) 57
Site-selective fluorescence studies on polysilylenes, A. Elschner, R.F. Mahrt, L. Pautmeier, H. Bässler, M. Stolka and K. McGrane 150 (1991) 81
Excitation energy transport in fractal aggregates, T.G. Dewey 150 (1991) 445

Molecular photophysical processes
Fluorescence depolarization of solutions and ordered systems. Photochemical reactions in the excited states. I. General considerations, J.J. Fisz 150 (1991) 207

Absolute oscillator strengths for photoabsorption, photoionization and ionic photofragmentation of sulphur dioxide. I. The valence shell, G. Cooper, E.B. Zarate, R.K. Jones and C.E. Brion 150 (1991) 237
Absolute oscillator strengths for photoabsorption, photoionization and ionic photofragmentation of sulphur dioxide. II. The S 2p and 2s inner shells, G. Cooper, E.B. Zarate, R.K. Jones and C.E. Brion 150 (1991) 251
Shifts in photoionization fragmentation onsets. A direct measure of cooling in a supersonic molecular beam, K.-M. Weitzel, J. Booze and T. Baer 150 (1991) 263
Optimal control of molecular motion: nonlinear field effects, K. Yao, S. Shi and H. Rabitz 150 (1991) 373

Luminescence spectra, yields and lifetimes
Time decay and fluorescence quenching in a one-dimensional lattice, J. Dudkiewicz and R. Twardowski 150 (1991) 57
Site-selective fluorescence studies on polysilylenes, A. Elschner, R.F. Mahrt, L. Pautmeier, H. Bässler, M. Stolka and K. McGrane 150 (1991) 81
Correlations in anticrossing spectra and scattering theory: numerical simulations, U. Hartmann, H.A. Weidenmüller and T. Guhr 150 (1991) 311
Excitation energy transport in fractal aggregates, T.G. Dewey 150 (1991) 445

Non-linear responses (including optical)
Nonlinear optical properties of asymmetric polyphenyls: efficiency versus transparency trade-off, I. Ledoux, J. Zyss, A. Jutand and C. Amatore 150 (1991) 117
Dimethylaminocyanobiphenyl (DMACB): a new optimized molecular crystal for quadratic nonlinear optics in the visible, J. Zyss, I. Ledoux, M. Bertault and E. Toupet 150 (1991) 125

Reactions (including dissociation)
FT-IR spectral data and ab inito calculations for haloketenes, G. Davidovics, M. Monnier and A. Allouche 150 (1991) 395

–gas phase
An examination of primary and secondary dissociation pathways of trifluoromethanol: identification of plausible routes leading to the formation of hydrogen fluoride, J.S. Francisco 150 (1991) 19
Direct measurement of rate constants for the reactions of CH and CD with HCN and DCN, S. Zabarnick, J.W. Fleming and M.C. Lin 150 (1991) 109

–condensed phase
On the solution of the Debye–Smoluchowski equation with a Coulomb potential. II. An approximation of the time-dependent rate constant, S.D. Traytak 150 (1991) 1
Non-equilibrium effects on forward and reverse rate coefficients of reversible reactions in solution: A stochastic approach, W. Naumann 150 (1991) 187
Pressure effect on positronium reactions in organic solutions, Y. Kobayashi 150 (1991) 453

–photochemical
Direct measurement of rate constants for the reactions of CH and CD with HCN and DCN, S. Zabarnick, J.W. Fleming and M.C. Lin 150 (1991) 109

Tunnelling
Generalized golden rule approach to the H-transfer problem in polyatomic systems. 1. Multimode nuclear effects in solids, Z.K. Smedarchina 150 (1991) 47

Electron transfer
Mössbauer spectra of mixed-valence dimeric iron clusters in charge-ordered crystals, A.V. Koryachenko, S.I. Klokishner and B.S. Tsukerblat 150 (1991) 295

Positron annihilation
Pressure effect on positronium reactions in organic solutions, Y. Kobayashi 150 (1991) 453

Ionization (including Rydberg states)
Electron momentum spectroscopy of sulphurhexafluoride, E. Weigold, Y. Zheng and W. von Niessen 150 (1991) 405

Isotopic effects
Generalized golden rule approach to the H-transfer problem in polyatomic systems. 1. Multimode nuclear effects in solids, Z.K. Smedarchina 150 (1991) 47

Thermodynamic and transport properties
A comparative study of the water-dimer gas-phase thermodynamics in the BJH- and MCYL-type flexible potentials, Z. Slanina 150 (1991) 321

Structure of solids and liquids
Electrostatic interactions within helical structures of chiral lipid bilayers, J.S. Chappell and P. Yager 150 (1991) 73
